Two years at NTT DATA building and maintaining .NET APIs for banking and supporting real-estate applications. On my own I designed, built and launched the website and CMS of a real business with Astro and Cloudflare.

EXPERIENCE

Developer · Support and Maintenance Oct 2025 – Jul 2026
NTT DATA · Support for several applications of a real-estate client.

- Handled tickets and resolved functional and technical incidents.
- Analysed and fixed incident data with SQL and JavaScript.
- Coordinated with other teams on operational tasks without service interruptions.

Web Developer Sep 2024 – Oct 2025
NTT DATA · .NET Web API services for a banking client: its website and mobile app.

- Designed and maintained endpoints consumed by Java systems, and worked on new services and versioning for the mobile app.
- Automated all API service tests with Postman collections.
- Implemented a client-side failure automation tool to keep incidents under control and resolve them sooner.
- Worked on the bank's new website with usability, performance and security improvements.
- Resolved F&F, UAT, accessibility and service incidents, plus security ones: access reviews and validation.

Intern Apr 2024 – Jun 2024
NTT DATA · Work placement in the team maintaining a bank website.

- Rebuilt a whole section of the site to the client's requirements, both design and functionality.
- Fixed bugs and shipped improvements in the .NET application.
- Supported the Application Management team with incidents.

PROJECTS

Calzado Francis Aug 2026 – Sep 2026
Real client · Live · reparaciondecalzadofrancis.es

Website and custom CMS for a shoe repair workshop in Leganés, Madrid, with +38 years in the trade. I built it end to end: design, development, deployment and SEO. The goal was for the owner to change almost everything without calling me.

- Private panel to edit copy, photos, services, FAQs, monthly opening hours, holidays and notices.
- Every service created in the CMS generates its own page, URL, SEO metadata and sitemap entry.
- Serverless backend with Cloudflare Pages Functions and Workers KV; the admin panel sits behind Cloudflare Zero Trust.
